

FASTENERS & MUST HAVES

SENCO[®]

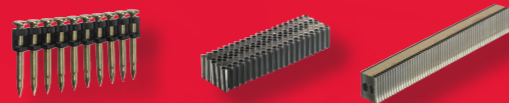

FASTENERS

Senco offers a wide range of fasteners. For every application, data sheets are available with different specifications, such as point geometry, material and surface coating. For advice contact your Senco dealer.

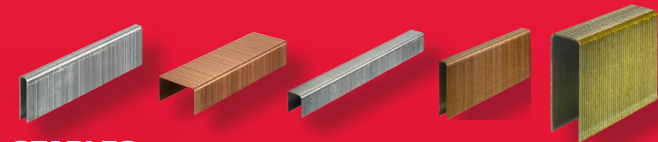

NAILS

- Nails on coil or strip
- Available variations:
 - Smooth, screw or ring shank
 - Bright basic, (hot dipped) galvanized
 - Sencoted for easier drive-in and higher pull out force
 - In retail and industrial packaging

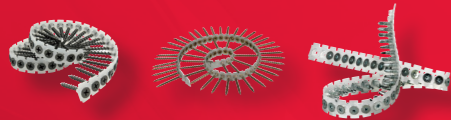

OTHER FASTENERS

- Concrete/steel pins
 - For fixings to concrete and steel
 - Ideal for drylining, pipework, cabling etc.
- Corrugated fasteners
 - Instead of nails, where timber may split
 - In small timber corrugated fasteners have greater holding power than nails

STAPLES

- Senco has three categories of staples: fine, medium and heavy wire
- Various applications: upholstery, felt insulation, shoe making, dust cover, roof singles and felt, underlayment, hardwood floors.

COLLATED SCREWS

- Best quality screws for collated screw systems
- For a wide range of applications
- Wide product range: head, size, material and finish, thread, etc.

MUST HAVES

This new assortment Senco air accessories offers the best link between Senco tools and Senco compressors.

PLUGS & COUPLERS

These are high quality accessories. The couplers are universal and fits a.o. Cejn 320 and Orion plugs. All plugs are heat treated for longer lifetime. The plugs and couplers have pipe sealant to prevent air leakage when you connect them to tools.

HOSES & HOSE REELS

Ready to use hose kits including plug and coupling, made from high quality polyurethane.

AIR ACCESSORIES

From air compressor accessory kits to airblow guns

TOOLS

XTREMEPRO SERIES

Senco's XtremePro™ line represents the gold standard in pneumatic tools. These tools are performance-designed for heavy duty customers using the tool all day, every day. These tools are designed for industrial users who want the very best tool money can buy and are covered by our standard 5 year warranty.

PRO SERIES

Senco's ProSeries™ line is designed for heavy to medium duty users with no compromises in quality, versatility or value. Building on Senco's successful 50-year professional tool architecture, the ProSeries™ tools include many of the latest advantages in pneumatic tool design and are covered by a 1 year warranty.

FUSION TECHNOLOGY

Simply driven by a 18v Li-ion battery, the Fusion™ tools work on the patented "air spring" technology, which makes them the world's only cordless pneumatic tool range. Senco Fusion is lighter and more compact than common cordless or gas tools. Because it is based on the same principles as a pneumatic tool, the methodology is simple, effective and proven. It even has the same sound and feel as a pneumatic tool. There is no need for expensive fuel cells or compressed air. You just need to charge the battery and can keep on working as long as you want. The Fusion tools are available for ø 1,2-1,8 mm finish nails.

GAS TECHNOLOGY

Senco's gas tools are designed for cordless convenience. The tools are reliable and powerful and the line consists of a complete selection of framers, finish nailers, metal connector nailers and concrete pinners. The tools are powered by 40 or 80gr fuel cells. The following fasteners are available:

- ø 1,2-1,8 mm finish nails
- ø 2,9-3,4 mm stripnails
- ø 2,7-3,1 mm concrete/steel pins

COMPRESSORS

Senco also has a complete range of compressors and accessories. The compressors fit especially well with Senco tools, but can be used everywhere. Made according to the highest standards, with high quality components. The range consists of 18 variations, from 3 to 50 L, and 0,5 to 3,5 HP.

DURASPIN

Senco developed a whole new line of DuraSpin tools. The look and feel is in the line of the successful Fusion tool series, therefore adding value to the Senco brand in the market. The tools are more ergonomic, the comfortable grip, great balance and the smooth drive system gives you a powerful tool for everyday use. The smooth drive operation with a variable speed trigger allows you to control the rpm of the tool. The patent pending corner fit feed system gives a lot better line of sight with a great access to corners. The battery powered tools share the same platform as the Fusion series, so they are now fully compatible. Also the new DuraSpin tools come with a high power 3.0 Ah Li-ion battery.

SCREWDRIVERS AND DRILLS

Senco also has first class pneumatic and electric screwdrivers and drills for the professional end-user. The screwdrivers as well as the drills are extremely powerful, well balanced and operate at a low noise level thanks to the soundproofing material in the air exhaust.

PALLETPRO SERIES

Senco's PalletPro™ line is specifically designed for use in the pallet and packaging industry. The PalletPro™ tools are optimized for heavy duty use, being well balanced, silent and fast. The tools have low maintenance costs, and you can choose from a very complete range. The PalletPro™ Series is the choice of pallet manufacturers.

SEMI-PRO SERIES

Senco's SemiPro™ line is designed for light duty and semi professional users who do not require to use the tools on a daily basis. SemiPro™ tools are available in a restrictive mode for your ultimate safety and are covered by a 1 year warranty.

MAKING HARD WORK EASIER
